

Request for Qualifications for On-Call Engineering Services and Water Quality

The Sativa Los Angeles County Water District is in need of an engineering firm to assist with engineering services for different water related activities and programs on an on-call basis. The District would utilize the services of a qualified engineering firm including in the area of water quality. Please submit packet that includes your firm's experience and qualifications. A standard rate sheet needs to be included.

The District's current water serve area includes the area of Willowbrook and small piece of Compton. The District provides potable water to approximately 7,000 people through 1,600 connections.

The District's water supply is from 3 groundwater wells. Services will include: water quality issues and programs when requested, design, construction assistance and permitting as required when requested, plan review when requested, fire flow projects, management technical studies when requested, and support services when requested.

The deadline is June 7, 2017 12:00 pm. Please submit proposals to:

Sativa Los Angeles County Water District
2015 E. Hatchway Street
Compton, CA 90222

The deadline may be extended by the General Manager if requested.
